SENAI TECHNOLOGY INSTITUTE OF INFORMATION AND COMMUNICATION

Senai's Institute of Information and Communication Technology offers integrated solutions in Information and Communication Technology and Industrial Automation, encompassing applied research, technological innovation, consulting and laboratory services. Thus, it aims to contribute to the digitization of industries and to be recognized as a pivotal asset for the development of software programs.

LABORATORIES

- Computer laboratory
- Software quality and testing bureau
- Software factory
- Automation and industrial networks
- Electrical electronics and energy efficiency
- Electronic circuits prototyping
- Domotics
- Calibration of measuring instruments
- Biotechnology Laboratory

CONSULTING SERVICES

INFORMATION AND COMMUNICATION TECHNOLOGY

- **ICT Management**
- **ICT Intelligence**
- **Information Systems**
- **Outsourcing of components development for systems integration**
- **Software development process improvement, according to the reference models: CMMI, MPS.Br, ISO**
- **Project management: PMI, IPMA, SCRUM**
- **ICT Governance Systems**
- **APS (Advanced Planning Systems) Development**
- **IoT (Internet of Things): integration and development**
- **Processing of data and information: data mining and business intelligence (BI)**
- **Governance and management of data**
- **Intelligence in the production process (EMI - Enterprise Manufacturing Intelligence)**
- **Electronic circuits prototyping**
- **Embedded systems: software and hardware**

TECHNOLOGICAL INNOVATION

• Technological solutions provider in research, development and innovation in the ICT (Information and Communication Technology) sector
